

Kevin Klöcker

Industrial Designer with 10+ years of agency experience, specializing in holistic product design at the intersection of hardware and software.

I design physical products, from consumer goods to industrial Products. My approach is user-centered and systems-driven, creating product experiences that resonate emotionally, perform with functional excellence, and achieve strong market positioning. My expertise in UX/UI design additionally enables me to develop products where physical form and digital interaction work in seamless concert.

EXPERIENCE

GENERATIONDESIGN GmbH - Design Lead
2014 - today, Wuppertal

Leading and shaping end-to-end product development with a focus on Industrial Design, User Experience, and strategic product positioning.

- Taking physical products from concept through production readiness in close collaboration with engineering, manufacturing, and marketing teams across multiple industries (consumer goods, industrial equipment, solar energy)
- Designing products with integrated digital interfaces (touchscreen HMIs, apps) for a seamless user experience across all touchpoints
- Conducting user research, prototyping, and usability testing to validate design decisions and drive user-centered product optimization with up to 100 participants
- Owning design strategy, visual identity, and art direction to ensure consistent brand positioning across product, communications, and trade show presence
- Leading cross-functional projects from kickoff through launch in collaboration with clients, stakeholders, engineering, and development teams
- Ensuring design excellence by aligning aesthetics, functionality, manufacturing feasibility, and business objectives
